

Thermo Group

Electric boilers **Mini Europe**

An electric boilers
with safe values!

Quality

We help you to complete your project for free.
Our products can be easily install by yourself!

Reliability

Our electric boiler work without electronics.
Our electromechanical technology is lifelong changeable.

2 years warranty

Spare parts for all products are available and our European manufacturing guarantee quality products.

Automatic

Adjustable power

Compact

Electric boiler Mini Europe

Without pump

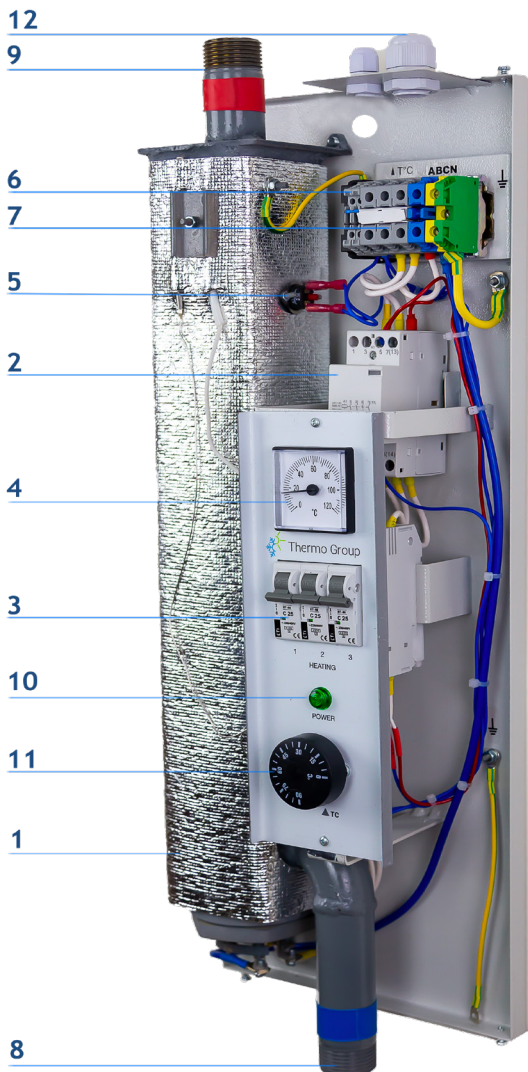

Our mini electric boiler for easy installation in your central heating network.

Multi energy compatible with all hydraulic systems:
Radiator, underfloor heating ...

Regulation

Guaranteeing your comfort and your savings, a bi-wire terminal block is provided in the boiler in order to install a regulation system (room thermostat) compatible.

Equipment

1. Insulated stainless steel heater
2. Quiet Switch ETI
3. Power Circuit Breakers ETI
4. Thermostat
5. Overheating protection 80°C
6. Connection for room thermostat
7. Power supply terminal block
8. Cold water connection ET 1"
9. Hot water connection ET 1"
10. Power LED
11. Network temperature setting
12. Cable gland power cable

Optional accessories

- REFLEX 18L** Expansion vessel 18 liters for heating network
- REFLEX EXDIRT** Dirt separator for heating network
- REFLEX EXVOID** Microbubble for heating network
- SPCO FGD25-6** Heat circulating pump Energy class A 7 meters for heating network
- FLEXIBLE 1,50 M** Flexible adjustable up to 1.5 m
- CABLE** Power supply cable to connect the electric boiler
- POWER BREAKER** Circuit breaker and Differential switch to Protection of the installation on the dashboard of the housing
- ROOM THERMOSTAT** Mechanical Room thermostat 5 ° C to 30 ° C Belux Watts, cable
- TEMPERATUR LIMITER** 20°C-60°C on ducts, as a security for a heating floor

kW Power

It is important to select the right power of its boiler to optimize the electric subscription and thus limit the cost of installation (power cable section, circuit breaker, ...).

Personal advice:

Our heating expert calculates free of charge a heat loss report of your home allowing to define the power to install.

Reference	Power (kW)	Adjustable Power	I-1 phase (A)	I-3 phases (A)
MINIEU4.5	4,5	1,5 - 3 - 4,5	20	6.5
MINIEU6	6	2 - 4 - 6	26	9
MINIEU9	9	3 - 6 - 9	39	13
MINIEU12	12	4 - 8 - 12	52	17
MINIEU15	15	5 - 10 - 15	-	22
